

$$= 1.2 \times 60 \text{ miles per hour}$$

$$= \underline{\underline{72 \text{ m.p.h.}}}$$

Method 2

$$25 \text{ minutes} = \frac{25}{60} \text{ of an hour}$$

$$S = \frac{30 \text{ miles}}{\frac{25}{60} \text{ hours}}$$

$$= \underline{\underline{72 \text{ m.p.h.}}}$$
